Professor Cañive is originally from Cuba, earned his MD from the Universidad Complutense, Madrid, Spain, and obtained his Diploma in Post Graduate Medicine (DPM) with emphasis in Psychiatry at McGill University, Montreal, Canada. Dr. Cañive is pursuing psychopathology research with a unique combination of research methods and technologies, the most promising being magnetoencephalography (MEG). MEG facilities are relatively widespread in Europe, but the United States has lagged significantly. His research on the cortical basis of the schizophrenia sensory gating deficit is at the cutting edge of clinical neuroscience. Innovative aspects of his research have received national recognition through consecutively funded research proposals from the Mental Illness and Neuroscience Discovery Institute (MIND), the National Institutes of Health, and the VA Merit Review Program with a yield of 21 scientific articles on the subject published in peer-reviewed journals from 2003 to 2007. In addition to this groundbreaking work in biological psychiatry, he has contributed to our understanding of psychosocial factors in schizophrenia and to consideration of ethnic factors in psychopathology more generally. He was a member of NIH Clinical Psychopathology Initial Review Group from 1994 to 1999, a member of NIH Interventions Committee for Disorders Related to Schizophrenia, Late Life, or Personality (ITSP) Initial Review Group from 2004 to 2009 and member of the NIH Interventions Committee for Adult Disorders from 2009 to 2010. He has received numerous awards including the National Alliance for the Mentally Ill (NAMI) Exemplary Psychiatrist Award, the Best Mentor/Teacher Award from the New Mexico VA Health Care System for 3 consecutive years, the University of New Mexico Department of Psychiatry Milton Rosenbaum Award for Competence, Curiosity, Generativity and Generosity. He also obtained the Simon Bolivar Award from the American Psychiatric Association in 2008 and the Earl Walker Award for Outstanding Achievement in Neuroscience Research from the University of New Mexico in 2009. He has been a member of the American College of Psychiatrists since 2003 and in 2010 and was elected member of the American College of Neuropsychopharmacology. He has been President of the American Society of Hispanic Psychiatry (ASHP) and the Psychiatric Medical Association of New Mexico. He is a reviewer for many prominent psychiatric journals and has published numerous peer-reviewed articles. He has mentored a cadre of junior investigators has lectured widely on the neurobiological aspects and treatment of schizophrenia and PTSD.
